

LCD Monitor Table Compartment – A280

Motorized LCD monitor lift for hidden table storage

The LCD Table Compartment holds an entire LCD monitor, automatically elevated from hide-away storage into full or partial view by electric motors.

Perfect for any center hosting videoconferences, presentations, or meetings, the LCD Table Compartment protects LCD monitors from dust & damage, allows avoiding continual monitor set-up, saves space, and provides for a clear & organized appearance in your meeting room.

Install the LCD Table Compartment in your boardroom, development center, finance department, computer room, marketing department, or anywhere a group requires video or computer graphics viewing.

Features:

- **Power Management:** LCD Monitors are powered-on when actuated and powered-off when in storage.
- **Water & Dust Resistant:** Advanced sealed-circuit technology protects components from dust and moisture.
- **Centralized Control:** Motorized actions may be controlled from a single control center through RS232 connections.
- **Quiet Operation:** Slide-rail operation designed for low sound levels of less than 30 decibels.

Model	Box size WxLxH(mm)	Top Panel AxB(mm)	Inside dimension CxH(mm)	Monitor dimension Thickness*Width*Height(mm)	Weight(kg) +wood
