- **Light-weight, frameless, easy to install and removable without leaving any marks**

The simple and flawless design with easy installation procedures. Above and beyond, the special frameless feature allows your LCD Monitor to stay sharp and clean appearance.

- **High-resistant material**

This special high-resistance material can keep your delicate LCD Monitor from getting scratches or breakings because of accidental impacts.

- **No dust ! No scratches by cleaning !**

Consider that your LCD Monitor screen collects dust and fingerprints. Most scratches come from cleaning. The LCD filter can avoid the screen attracting the dust in the environment. Therefore, you never need to clean the LCD screen directly. This improves the life of your LCD Monitor.

- **Enhances image resolution and quality**

Quality lens of the LCD filter can truly bring out the sharpness and contrast from the LCD screen to provide users the top quality, entertaining images.

- **Anti-UV ray !** -> optional item number by "U" extra

Reduces ultraviolet (UV) to minimize eye fatigue and body & skin injury while using the LCD Monitor for a long time
